

2021 Child Health Residency Simulation boot camp

The Child Health Residency Simulation boot camp is for first-year Pediatrics and Internal Medicine-Pediatrics residents at MU. The boot camp was held on June 18, 2021 and will continue to be held annually.

Continuing Simulation Education sessions are held quarterly on a Thursday and usually are two hours in duration. They provide a safe learning environment where there are no “errors”, only learning opportunities.

Groups of three to five residents work with a faculty facilitator at each station and practice one procedural skill and three scenarios. Each station lasts approximately 30 minutes.

The procedures practiced are selected by the group of participating residents and the chief resident a week in advance.

2021 sessions were held on

September 30, 2021, Feb 24, 2021, and Apr 28, 2021

- Skills practiced
- Casting of fractures
- Wound suturing
- Central lines
- Pediatric airway
- Scenarios

Participating Faculty

- [Kevin Cutler, MD](#)
- [Sumit Gupta, MD](#) and Chirag Seth, MD
- [John Pardalos, MD](#)
- [Venkataraman Ramachandran, MD](#) & Ms. Deborah Phelps, LPN OMS
- [Elizabeth Sheppard, MD](#)
- [Akshaya Vachharajani, MD](#)
- [Sarah Younger, MD](#)

Special Thanks

The boot camp could not have been accomplished without the support of the Sheldon Clinical Simulation Center and the following participants:

- Penny Adams, C-TAGME
- Marty Runyan, BSN RN
- Bobby Horn, EMT- P
- Charles McBee, BS
